Position available

Project Name: Proteomic profiling of extracellular vesicles (EVs) to identify markers that may facilitate specific isolation of tumor EVs from patient serum

Funding agency: ICMR

Brief description: Breast cancer has the highest incidence among all cancers in women. We work on liquid biopsy approaches to understand the contribution of circulating cfDNA and extracellular vesicles (EVs). This project aims at understanding contents of EVs (transcriptomics and proteomics) and their biological effects in cellular model systems/primary tissues. For more details contact Kartiki V. Desai (kd1@nibmg.ac.in).

A Walk-in interview is scheduled on 13/03/2024 (2:00 pm)

Selected applicants will be appointed for an initial period of 3 months. Students who have submitted their thesis but have not received their Ph.D degree are not eligible for this post.
